

About MentAi

MentAi is an app created with the purpose of not only spreading awareness, but helping those on the spectrum. Mostly, people who have been diagnosed with autism.

Firstly, what is autism and what does it mean to be autistic?

• • •

In MentAi, our goal is to develop an app with an Ai that can aid you, your child, or a student of yours dealing with a mental issue that either makes it harder for them to communicate, to prevents them from communicating altogether. (Take points from Leyla's essay.)

Some research has shown, that this newly developing AI and its amazingly fast adaptation speed can cater to the needs of people with neurological and developmental disorders. This catering can include:

1. Simple conversation they'd usually struggle with when involving real humans.
2. Therapy sessions (Similar to normal conversations but more professional)

etc...

Cue in the Ai vid

(A bit more info.. Prob explaining the video and matching it to our business idea)

(This shld be at the bottom btw)

About us:

We are a group of innovative students with a motive of making life easier for people that weren't exactly given a fair start. (Blah blah, smth like that but not rllly. It shld sound more professional.)

Contact us:

(We need to have a group email)

(I don't know whose number to use, so skip that part for now)

(School email: General, then for each of us)
